Reviewer A:

Relevance and Timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.:
 Acceptable

Technical content and scientific rigour. Rate the technical content of the paper (e.g.: completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc.), its soundness and scientific rigour.
 Valid work but limited contribution.

Novelty and originality. Rate the novelty and originality of the ideas or results presented in the paper.:
 Minor variations on a well investigated subject.

Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references.:
 Readable, but revision is needed in some parts.

Detailed Comments: Please elaborate your recommendation and suggest improvements in technical content:
 1. Authors should discuss and state their proposed research gaps in a more clear and detailed manner.
 2. The first sentence in Chapter 2 is incomplete.

improvements in technical content:
 1. Authors should discuss and state their proposed research gaps in a more clear and detailed manner.
 2. The first sentence in Chapter 2 is incomplete.
 3. Clear citation should be written when using figures from other literatures.
 4. Some parts of the manuscript still use Indonesian.
 5. In the testing, the distance between sensor and object does not seemingly represent the actual distance in real application. Authors are invited to give some discussion regarding the accuracy about this matter.
 6. The equation of success percentage is not clear, and needed to be checked.

Recommendation: How do you rate your recommendation?
 Accepted with major revisions

Reviewer B:
